Software Engineer with 4+ years of experience building production systems in Java/Spring Boot, TypeScript/Angular, React, and Python, including a SaaS platform I founded and owned end-to-end as CTO. Engineering Physics background with additional training in AI/ML and experience developing Python-based data workflows.Experienced in RESTful APIs, micro-services, AWS infrastructure, Docker, CI/CD, and distributed enterprise systems. Owning end-to-end delivery of production systems: from architecture and backend/frontend development through cloud deployment and production support.

Professional Experience

ATOM Technologies — *Dubai, UAE*

Next generation specialty insurance & underwriting platform · 50+ global insurance partners

Full Stack Product Engineer | Oct 2026 – Present

Working on the development, deployment, and integration of full-stack applications using JavaScript, NestJS, TypeORM, and React, alongside AWS cloud infrastructure and AI-assisted development tools.

- Analyzed end-to-end monorepo architecture and deployment workflows through infrastructure-as-code, without relying on the AWS Management Console.
- Executed production deployment of an application, including database and S3 data migration from QA to production.
- Configured AWS services and infrastructure, including S3 and Amazon Cognito, enabling Microsoft Single Sign-On.
- Developed a Jira Forge application and enabled API integrations using OAuth 2.0 authentication.
- Worked with AWS services including CloudFormation, CodeBuild, CodePipeline, ECR, ECS, CloudFront, CloudWatch, RDS, ALB, VPC, Secrets Manager, SNS, SQS, and SES.

ADP (Automatic Data Processing) — *Barcelona, Spain*

Global leader in HR and payroll solutions · 1M+ enterprise clients · 140+ countries

Senior Software Engineer | Sep 2022 – Jan 2026

- Transitioned from frontend specialist to full-stack contributor in under 6 months, becoming a key bridge between the Scrum Master and the development team.
- Designed and delivered full-stack features across a Typescript Angular frontend and Java 17/21 Spring Boot backend, supporting business-critical payroll and HR workflows for enterprise clients at scale.
- Built and maintained RESTful APIs using an API-first approach, ensuring backward compatibility and enabling seamless cross-product integration across the company's main platform suite.
- Developed all frontend components to WCAG AA standard, and identified and resolved pre-existing a11y and i18n gaps across the flagship product, improving compliance and reach across global enterprise deployments.
- Delivered a new end-to-end product integration workflow from scratch in 1 sprint (vs. 3+ sprint average), collaborating directly with SAP teams to enable cross-system data flows.
- Implemented new frontend functionality that increased end-user productivity by 10x, identified through direct user feedback analysis and delivered via Angular components.
- Resolved recurring customer-impacting downtime by diagnosing and fixing data inconsistencies at the database and service layer, improving platform reliability within SLA.
- Mentored 5+ engineers (junior and senior) through onboarding and integration into the development team, reducing ramp-up time and improving team delivery consistency.

Kaptura Software | Product Centrica — *Barcelona, Spain*

Early-stage SaaS platform automating communication workflows between dental clinics and laboratories. Side project.

Co-Founder and CTO | Jun 2023 - Dec 2025

- Architected and built a full-stack cloud-native platform using Javascript React (frontend) and Java Spring Boot (backend), with a modular architecture designed to support future scaling as transaction volume grew.
- Designed and implemented JWT-based authentication and role-based access control securing multi-role API access across clinics and laboratories.
- Built and deployed infrastructure on AWS with Dockerized services and automated CI/CD pipelines.
- Designed scalable database schemas in MySQL using Hibernate ORM to handle high volumes of transactions reliably.
- Integrated third-party payment processing (Stripe) and automated email notification workflows using Java Mail Sender, reducing manual intervention by an estimated 10–40%.
- Owned product delivery: technical design, development, deployment and production support without an ops team.

Bluecap Consulting — *Madrid, Spain*

Boutique analytics consulting firm · 40+ global financial institution clients

Business Analyst | Feb 2021 – Sep 2021

- Developed and automated SQL-based workflows to build IFRS 9-compliant impairment models, streamlining expected credit loss calculations across large datasets for multiple banking clients.
- Built a new data environment for a top-tier Spanish bank to enable default probability analysis across mortgage and loan portfolios.
- Automated big data query integration into client-ready reporting decks, improving iteration speed by 1.5x.

PricewaterhouseCoopers *Barcelona, Spain*

Multinational professional services - Big Four Accounting Firm

Junior Systems Auditor | Sep 2020 – Feb 2021

- Assessed IT general controls, database security, infrastructure, and business process controls across multiple financial clients as part of external audit engagements.
- Analyzed journal entries and financial application controls to evaluate risk exposure in client reporting processes.

Education

Machine Learning Specialization | DeepLearning.AI / Stanford Online	2026 – Present
CS50's Introduction to **Artificial Intelligence** with **Python** | HarvardX (via edX)	2026
Master's in Design and Management of Technological Projects | *UNIR*	2020 - 2021
Deutsches Elektronen-Synchrotron DESY | Summer Research	Hamburg, 2019
• Awarded the Summer Student Program scholarship to attend the German Synchrotron (DESY). Developed an end-to-end Python workflow to compute Beamline theoretical intensity output in under 6 weeks.	
Bachelor's in Engineering Physics | *Polytechnic University of Catalonia (UPC)*	2016 - 2020
Professional Certificate in Design and Development of Webpages.	2022
High Distinction in the University Access Examinations. Scored above 9/10 in the general phase	2016

Skills

Languages: Java (8, 17, 21), Python, JavaScript, TypeScript, SQL

Frontend: Angular, AngularJS, React, HTML5, CSS3, Bootstrap, Accessibility (a11y), i18n

Backend & APIs: Spring Boot, Spring, Hibernate, RESTful APIs, Micro-services, JWT, API-first design, Apache

Cloud & DevOps: AWS (EC2, RDS, S3), Docker, CI/CD Pipelines, Jenkins, Bitbucket Pipelines, Nginx

Data & Observability: MySQL, PostgreSQL, Redis, Splunk, Structured Logging, Maven

Testing & Quality: JUnit, Mockito, Integration Testing, Secure Coding Practices, Jest

Languages spoken: Spanish (native), Catalan (native), English (fluent), French (intermediate), Arabic (beginner, currently learning)

Additional Information

Nationality / Work Authorization: Authorized to work in the EU (Spanish nationality), Authorized to work in UAE.

Interests: Running (2x Half Marathon), Yoga, Racket Sports, Advanced Open Water diving certified
