

Nuria Olivares - Senior Software Engineer | Full Stack

+34663389109 · nuriaolivaresroyo@gmail.com · <https://www.linkedin.com/in/nuria-olivares-royo/> · <https://github.com/NuriaOlivares>
<https://cv-frontend-production.up.railway.app/>

Full-stack Software Engineer with 4+ years delivering end-to-end features across Java/Spring Boot backends and Angular/React frontends in large-scale, high-availability enterprise environments. Proven track record designing and owning RESTful APIs, micro-services architectures, and production-critical systems serving millions of users. Experienced in CI/CD pipelines, cloud infrastructure (AWS), observability practices, and cross-functional collaboration in agile teams. Background in Engineering Physics brings a rigorous, systems-thinking approach to complex technical problems, trained in probabilistic modeling, signal processing, and mathematical methods. Founded and built a SaaS platform end-to-end as sole technical owner.

Professional Experience

ADP (Automatic Data Processing)

Barcelona, Spain

Global leader in HR and payroll solutions · 1M+ enterprise clients · 140+ countries

Senior Software Engineer | Sep 2022 – Jan 2026

- Transitioned from frontend specialist to full-stack contributor in under 6 months, becoming a key bridge between the Scrum Master and the development team.
- Designed and delivered full-stack features across a Typescript Angular frontend and Java 17/21 Spring Boot backend, supporting business-critical payroll and HR workflows for enterprise clients at scale.
- Built and maintained RESTful APIs using an API-first approach, ensuring backward compatibility and enabling seamless cross-product integration across the company's main platform suite.
- Developed all frontend components to WCAG AA standard, and identified and resolved pre-existing a11y and i18n gaps across the flagship product, improving compliance and reach across global enterprise deployments.
- Delivered a new end-to-end product integration workflow from scratch in 1 sprint (vs. 3+ sprint average), collaborating directly with SAP teams to enable cross-system data flows.
- Implemented new frontend functionality that increased end-user productivity by 10x, identified through direct user feedback analysis and delivered via Angular components.
- Contributed to observability practices across backend micro-services using structured logging and Splunk, reducing mean time to diagnose production incidents.
- Resolved recurring customer-impacting downtime by diagnosing and fixing data inconsistencies at the database and service layer, improving platform reliability within SLA.
- Mentored 5+ engineers (junior and senior) through onboarding and integration into the development team, reducing ramp-up time and improving team delivery consistency.

Kaptura Software - Centrica

Barcelona, Spain

Early-stage SaaS platform automating communication workflows between dental clinics and laboratories

Co-Founder and CTO | Jun 2023 - Dec 2025

- Architected and built a full-stack cloud-native platform using Javascript React (frontend) and Java Spring Boot (backend), with a modular architecture designed to support future scaling as transaction volume grew.
- Designed and implemented JWT-based authentication and role-based access control securing multi-role API access across clinics and laboratories.
- Built and deployed infrastructure on AWS (EC2, RDS, S3) with Dockerized services and automated CI/CD pipelines, owning the full deployment lifecycle from development to production.
- Designed scalable database schemas in MySQL using Hibernate ORM to handle high volumes of clinic and laboratory transactions reliably.
- Integrated third-party payment processing (Stripe) and automated email notification workflows using Java Mail Sender, reducing manual intervention by an estimated 10–40%.
- Owned end-to-end product delivery: technical design, development, deployment, IT, and production support with no dedicated ops team.

Bluecap Consulting

Madrid, Spain

Boutique analytics consulting firm · 40+ global financial institution clients

Business Analyst | Feb 2021 – Sep 2021

- Developed and automated SQL-based workflows to build IFRS 9-compliant impairment models, streamlining expected credit loss calculations across large datasets for multiple banking clients.
- Built a new data environment for a top-tier Spanish bank to enable default probability analysis across mortgage and loan portfolios.
- Automated big data query integration into client-ready reporting decks, improving iteration speed by 1.5x.

PriceWaterhouseCoopers

Barcelona, Spain

Multinational professional services - Big Four Accounting Firm

Junior Systems Auditor | Sep 2020 – Feb 2021

- Assessed IT general controls, database security, infrastructure, and business process controls across multiple financial clients as part of external audit engagements.
- Analyzed journal entries and financial application controls to evaluate risk exposure in client reporting processes.

Education

Deutsches Elektronen-Synchrotron DESY | Summer Research

Hamburg, 2019

- Awarded the Summer Student Program scholarship to attend the German Synchrotron (DESY). Developed an end-to-end Python workflow to compute Beamline theoretical intensity output in under 6 weeks.

Bachelor's in Engineering Physics | *Polytechnic University of Catalonia (UPC)*

2016 - 2020

Master's in Design and Management of Technological Projects | *UNIR*

2020 - 2021

Professional Certificate in Design and Development of Webpages.

2022

High Distinction in the University Access Examinations. Scored above 9/10 in the general phase

2016

Skills

Languages: Java (8, 17, 21), JavaScript, TypeScript, Python, SQL

Frontend: Angular, AngularJS, React, HTML5, CSS3, Bootstrap, Accessibility (a11y), i18n

Backend & APIs: Spring Boot, Spring, Hibernate, RESTful APIs, Micro-services, JWT, API-first design, Apache, REST

Cloud & DevOps: AWS (EC2, RDS, S3), Docker, CI/CD Pipelines, Jenkins, Bitbucket Pipelines, Nginx

Data & Observability: MySQL, Redis, Splunk, Structured Logging, Maven, PostgreSQL

Testing & Quality: JUnit, Mockito, Integration Testing, Secure Coding Practices, Jest

Languages spoken: Spanish (native), Catalan (native), English (fluent), French (intermediate)

Additional Information

Nationality / Work Authorization: Authorized to work in the EU (Spanish nationality)

Interests: Running (2x Half Marathon), Yoga, Racket Sports, Advanced Open Water diving certified
